Key Insights & Recommended Actions

Overall findings | Sample Superstore | 2014–2017

Sales versus profitability
1. High sales can coexist with losses

Texas ranks third in sales but records a total loss of 25,729.36 across 2014–2017.

Recommended action: Review the products and discount bands contributing to the state's losses.

Product profitability
2. Product profitability varies considerably

Furniture earns a 2.49% profit margin, compared with 17.40% for Technology. Tables record a total loss of 17,725.48.

Recommended action: Review pricing and discount patterns in loss-making sub-categories.

Discounts
3. High discounts are associated with losses

Sales discounted above 20% have an overall profit margin of −37.32%, compared with 29.51% for sales without discounts.

Recommended action: Investigate product and state mix before changing discount limits.

Annual growth
4. Profit growth trails sales growth

In 2017, sales grew 20.36%, while profit grew 14.24%. Profit margin fell from 13.43% in 2016 to 12.74% in 2017.

Recommended action: Monitor profit margin and product mix alongside sales growth.
